Re: FirstLight Hydro Generating Company, FERC Project Nos. 2485 and 1889
Responses to Connecticut River Watershed Council comment letter dated March 25, 2016 and
Mr. Karl Meyer comment letter dated March 27, 2016

Dear Secretary Bose:

Pursuant to the process plan and schedule issued on September 14, 2015 by the Federal Energy Regulatory Commission (FERC or Commission) (Process Plan), on March 1, 2016, FirstLight Hydro Generating Company (FirstLight) filed 13 study reports for the relicensing of its Turners Falls Hydroelectric Project (FERC No. 1889) and Northfield Mountain Pumped Storage Project (FERC No. 2485). Pursuant to Process Plan, on March 16, 2016, FirstLight held a meeting to discuss the study reports filed on March 1, 2016.

On March 25, 2016, the Connecticut River Watershed Council (CRWC) sent a letter to FirstLight (and filed it with FERC) requesting supplemental data on five studies previously filed on March 1, 2016. Similarly, on March 28, 2016, Mr. Karl Meyer sent a letter to FirstLight (and filed it with FERC) requesting supplemental data on one study previously filed on March 1, 2016. The purpose of this letter is to respond to requests for further information from these parties. CRWC requested that FirstLight provide the information by April 22, 2016.

Under the Commission's Process Plan, stakeholders may file disagreements or requests to amend the Commission-approved study plan by April 30, 2016, and FirstLight may respond to any disagreements or requests to amend the study plan by May 30, 2016. Any request for modification of an approved study or for a new study must meet the criteria set forth in 18 CFR §§ 5.15(d) and (e) of the Commission's regulations, respectively. Also, 18 CFR § 5.15(b) states that "the potential applicant will provide documentation of study results" upon request of a participant. However, there is no provision in the Commission's Integrated Licensing Process regulations for the submission of interrogatories or general document requests.

FirstLight regards some of the information requested by CRWC and Mr. Meyer as "documentation of study results" and is herewith providing that information. However, FirstLight regards much of the information requested as additional information exceeding what is required by the Commission's approved study plan. Where FirstLight nonetheless can provide that information with reasonable effort, as indicated in its responses below (Attachment A and B), FirstLight will do so in its May 30 filing. In other cases, FirstLight believes that CRWC and Mr. Meyer need to provide a rationale for the additional information under the

criteria in 18 CFR §§ 5.15(d) or (e), as appropriate. FirstLight will respond to any such additional information requests in its May 30 filing.

Sincerely,

A handwritten signature in black ink, appearing to read "Gus Bakas", written in a cursive style.

Attachment A: Responses to CRWC comments

Study 3.3.6. Impact of Project Operations on Shad Spawning, Spawning Habitat and Egg Deposition in the Area of the Northfield Mountain and Turners Falls Projects

CRWC comment: The Revised Study Plan (RSP) dated August 14, 2013 stated in Task 3 that in the Turners Falls impoundment, "...Upstream surveys will target areas of suitable aquatic habitat for shad spawning based on HSI curves." A revised, track-changes version of this study plan was circulated to stakeholders on April 8, 2015. This version did not show this wording being deleted, but the resulting wording left standing does not specify that suitable habitat will be identified using HSI curves. Stakeholders may not have realized what was being changed. It doesn't appear that the revised study plan was submitted to FERC, however.

CRWC request: Please provide areas identified by HSI curves as suitable aquatic habitat for shad spawning in the Turners Falls impoundment. If this was not done, please identify any areas where it was thought there might be shad spawning habitat. Also provide documentation of the dates and times all survey sites in the impoundment were visited, and the launch location and time each night.

FirstLight response:

The final version of the study plan was sent to stakeholders, including CRWC, and FERC on April 29, 2016 via email. The sentence related to the HSI curves was not included in the final version. FirstLight conducted the study per the RSP, which included searching the entire Turners Falls Impoundment for shad spawning activity. After searching the entire TFI for shad spawning activity, the only area where spawning was found was near Stebbins Island.

Relative to the dates and times all survey sites in the TFI were visited and the launch location and time each night, FirstLight will provide the requested information as part of its Response filing on May 30, 2016.

CRWC request: Please provide launch location and time of all observations for all field days in the study (canal, bypass channel, and downstream of Cabot).

FirstLight response:

FirstLight will provide the requested information as part of its Response filing on May 30, 2016.

Study 3.3.18 Addendum. Impacts of Turners Falls Canal Drawdown on Fish Migration and Aquatic Organisms

CRWC comment: The revised RSP for this study, submitted as an Appendix to the ISR dated September 16, 2014, said that in Task 1, "A field crew of experienced biologists will systematically traverse each of the zones in a meander survey fashion recording observations of estimated number of each species encountered."

CRWC request: Please provide the observations and documentation of the meander survey. The revised RSP submitted with the ISR from Sept. 2014 states that, "The final number and placement of quadrats will be decided prior to the drawdown in consultation with the resource agencies and Conte Lab researchers. These data will be used to extrapolate counts for the entire area of suitable habitat within each zone."

FirstLight response:

The observations and documentation of meander survey were provided in the Addendum on Study No. 3.3.18 filed on March 1, 2016.

CRWC request: Please provide consultation documentation from the Conte Lab on the number and placement of quadrats.

FirstLight response:

See [Appendix A-1](#), which includes two letters sent to the resource agencies and Conte Lab.

Study 3.3.20. Ichthyoplankton Entrainment Assessment at the Northfield Mountain Project

CRWC request: Please provide the total time of pumping with 1, 2, 3 & 4 pumps, by week, from May 15 to July 15 for 2015 and for the period from 2006 to 2014 for the equivalent weeks. Please also provide the total time by pump for the nights in 2015 when samples were taken with more than one pump operating.

FirstLight response:

Relative to the total time of pumping with 1, 2, 3 and 4 pumps from May 15 to July 15, FirstLight will provide the requested information as part of its Response filing on May 30, 2016.

Relative to providing the same information for the period 2006 to 2014, FirstLight considers this a request for additional information outside the approved study plan.

Relative to providing the total time by pump for the nights in 2015 when samples were taken with more than one pump operating, FirstLight will provide the requested information as part of its Response filing on May 30, 2016.

CRWC request: Please provide in 15-minute intervals (or the shortest possible interval longer than 15 minute) discharge from the Vernon project for the period of May 15 to July 15, 2015.

FirstLight response:

FirstLight considers this a request for additional information that is outside the approved study plan.

CRWC request: Please confirm whether or not the column header on Table 4.1-2 of the report that says “Northfield Mountain Generation” was an error, and whether it should have said, “Northfield Mountain Pump-back (or Pumping).” If, in fact, generation took place during any of the sampling events, please identify which samples were collected during generation.

FirstLight response:

The column header on Table 4.1-2 was incorrectly shown as “Northfield Mountain Generation.” It should have read “Northfield Mountain Pumping.”

Study 3.6.1. Recreation Use/User Contact Survey

CRWC request: Please provide CRWC with traffic counter data at each site where a traffic counter was placed. We are interested in the total number of counts for the year, which calendar day experienced the highest use, and the number of counts on the peak use day for each site. We do not necessarily need the raw data.

FirstLight response:

FirstLight has filed its traffic counter data, in the form of spreadsheets (FL_2014_Traffic_Count_Data.xlsx). The PDF version of spreadsheets are attached hereto as [Appendix A-2](#).

CRWC request: Please provide CRWC with information on the time of day/duration of each calibration count at each site on each survey date. Section 4.1.3 in Study 3.6.1 listed recreation use during 2014 for several facilities.

FirstLight response:

FirstLight has filed its calibration count data, in the form of spreadsheets (FL_2014_Calibration_Count_Data.xlsx). The PDF version of spreadsheets are attached hereto as [Appendix A-3](#).

CRWC request: Please provide CRWC with the number of boat rentals, by boat type, at the Barton Cove Canoe and Kayak Rental Area for the years 2010-2014. Please provide the number of campers (or if that is

2010-2014. Dates of peak use would also be helpful.

FirstLight response:

The Recreation Use/User Contact Survey estimated use and demand at the recreation sites based on data collected during January – December 2014, not on prior years' data. As set forth in the study report, data to estimate use consisted of spot counts, calibration counts, traffic counts, and 2014 FirstLight use data at sites where FirstLight collects such data (see Table 3.2.1-5 of the study report for sites where FirstLight collects use data).

There are three components to Barton Cove – the Campground, the Canoe and Kayak Rental Area, and the Nature Area. FirstLight collects two sets of monthly use data at Barton Cove – one for the three areas combined and one for Barton Cove campground. FirstLight does not collect separate data for the number and type of boat rentals. To segregate use at the Barton Cove Canoe and Kayak Area, first, the monthly use at the Campground was subtracted from the monthly total for Barton Cove. This provided an estimate of combined use of the Canoe and Kayak Rental Area and Nature Area. Then, use was apportioned between the Canoe and Kayak Rental Area and the Nature Area based on data collected at the two areas during spot counts.

FirstLight does not collect data on the number of campers at the campgrounds. To estimate 2014 use at the campgrounds, campground registration data were used to calculate the total number of use nights by month. Individual campsites were assumed to have three campers per site on average and group campsites were assumed to have 16 campers on average.

For the Assessment of Day Use and Overnight Facilities Associated with Non-Motorized Boats (study 3.6.4), FirstLight reviewed data for campground occupancy for the years 2010-2014. The campground occupancy data (for both Munn's Ferry and Barton Cove), have been filed in the form of spreadsheets, for the years 2010-2014 (FL_2010-2014_Campground_occupancy.xlsx). The PDF version of spreadsheets are attached as [Appendix A-4](#).

CRWC request: Please provide total number of boat counts in the boat survey conducted for Study 3.1.2, and the data range of the boat counts. Feel free to list the caveats associated with this data (no way of knowing how many times the same boat passed by this spot in any given day, etc.).

FirstLight response:

The boat survey data is currently being evaluated as part of Study No. 3.1.2 and will be included in the final report for that study.

Study 3.6.5. Land Use Inventory

CRWC request: Please provide CRWC with the document or citation of the “FERC-approved permit program” that covers non-project use of project lands related to water withdrawals and docks and other uses besides camps. We are familiar with the plan for the historic camps that was submitted to FERC on October 10, 2008 and approved with modifications by FERC on October 28, 2009, and we already have a copy of this document as well as the FERC order. We are also familiar with the authorization of the solar array, and do not need copies of that. We are interested in the documentation (and FERC approval date) for the permit program for all the other uses as described in section 4.4 of the study report for 3.6.5.

FirstLight response:

FirstLight has an established Permit Program through which it administers non-project uses of Project lands including lands it owns in fee, or in which it has an interest. While there is no FERC approval of the Permit Program, the Permit Program follows the requirements of the Standard Land Use Articles in the current licenses for the Turners Falls and Northfield Mountain Pumped Storage Developments. Consistent with the Standard Land Use articles, FirstLight's Permit Program recognizes four categories of proposed uses of Project lands that require varying levels of FERC notification and control requirements. A copy of the

Permit Program is attached hereto as [Appendix A-5](#).

CRWC request: Please provide CRWC with a breakdown of the recreation land within the project boundaries (similar to Table 4.1-2 in the report) as follows: total acres of recreation land in the project boundary, total acres of recreation land owned by FirstLight (FL), acres of FL-owned recreation land that is part of the Northfield Mountain facility, acres of FL-owned recreation land other than Northfield Mountain that is a “public” facility, and acres of FL-owned recreation land other than Northfield Mountain that is under “private” use (the camps, boat club, rod & gun club, for example).

FirstLight response:

The intent of the approved study plan for Study No. 3.6.5 is to develop appropriate land use designations in order to aid in future land management decisions for lands within the Project boundary. FirstLight considers this a request for additional information that is outside the approved study plan.

Re: FirstLight, Relicensing of the Turners Falls Hydroelectric Project (FERC No. 1889) and Northfield Mountain Pumped Storage Project (FERC No. 2485), Study No. 3.3.18- *Impact of Turners Falls Canal Drawdown on Fish Migration and Aquatic Organisms*

Dear All,

FirstLight Hydro Generating Company (FirstLight) is currently in the process of relicensing its Turners Falls Hydroelectric Project (FERC No. 1889) and Northfield Mountain Pumped Storage Project (FERC No. 2485) with the Federal Energy Regulatory Commission (FERC). On August 14, 2013 FirstLight filed its Revised Study Plan (RSP). The purpose of this letter is to consult with the resource agencies and Conte Lab researchers about the final number and placement of quadrats that will be used to determine the distribution and relative abundance of juvenile sea lamprey (ammocoetes) and mussels as required in Study No. 3.3.18- *Impact of Turners Falls Canal Drawdown on Fish Migration and Aquatic Organisms*.

Study No. 3.3.18 is a study to quantify the impacts of the annual Turners Falls Project canal drawdown on emigrating and resident fishes, freshwater mussels and mudpuppies in the canal. The study will commence as soon as practicable after dewatering and will be completed on the day following the drawdown, 9/30/14. A crew of experienced biologists will conduct a meander survey in unwetted areas, and a backpack electrofishing and/or seine survey in wetted areas. Areas of the canal with appropriate soft sediment habitat will be sampled using 1-m by 1-m quadrats to determine counts of ammocoetes and mussels. Figure 1 displays the locations of the proposed quadrats. These were positioned in areas either along the banks or the hard bottom of the canal where sampling is possible without sinking in the soft sediments. Sample locations may be modified in the field if bottom sediments have shifted. When the canal is drawn down we may find out that some areas have been covered with the muck that makes some

places inaccessible. Please respond by August 1, 2014 to confirm that the number of quadrats and proposed locations will address your concerns about the study's potential impacts to ammocoetes and mussels. If no response is received, we will assume that the proposed locations are approved.

Sincerely,

Re: FirstLight, Relicensing of the Turners Falls Hydroelectric Project (FERC No. 1889) and Northfield Mountain Pumped Storage Project (FERC No. 2485), Study No. 3.3.18- *Impact of Turners Falls Canal Drawdown on Fish Migration and Aquatic Organisms*

Dear All,

FirstLight Hydro Generating Company (FirstLight) is currently in the process of relicensing its Turners Falls Hydroelectric Project (FERC No. 1889) and Northfield Mountain Pumped Storage Project (FERC No. 2485) with the Federal Energy Regulatory Commission (FERC). On July 17, 2014 FirstLight emailed a letter to resource agencies and Conte Lab researchers about the final number and placement of 1-m by 1-m quadrats that will be used to determine the distribution and relative abundance of juvenile sea lamprey (ammocoetes) and mussels as required in Study No. 3.3.18- *Impact of Turners Falls Canal Drawdown on Fish Migration and Aquatic Organisms*. John Warner and Jesse Leddick replied to the letter and requested more quadrats in the western bank of the canal, especially in Zones 3-5. Other requests include: identifying mussels found as part of quadrat surveys to species; reporting average and variances of species counts for each Zone, with habitat type and species included; reporting similar mean measurements and variances for ammocoete sea lamprey; describing the second survey to occur the day prior to rewatering the canal; and increasing the size of the 1-m by 1-m quadrats to 2-m by 2-m.

FirstLight considered your comments about the locations of the quadrats and as recommended have added additional quadrats on the western bank particularly in Zones 3-5 (Figure 1). These new sampling locations follow the recommendations that along the western bank, thalweg and eastern bank each have at least 10 quadrat locations. We plan to identify the mussels found in the quadrat sampling to species and

will report the average and variances of species counts by Zone including habitat type for mussels and ammocoete sea lamprey. As indicated in the SPDL, FirstLight plans to conduct a second survey, the same as the first survey, the day before the canal is rewatered on Friday October 3, 2014. However Firstlight does not plan to increase the quadrat size from 1-m by 1-m to 2-m by 2-m as FERCs Study Plan Determination Letter approved the use of 1-m by 1-m quadrats as set forth in the Revised Study Plan.

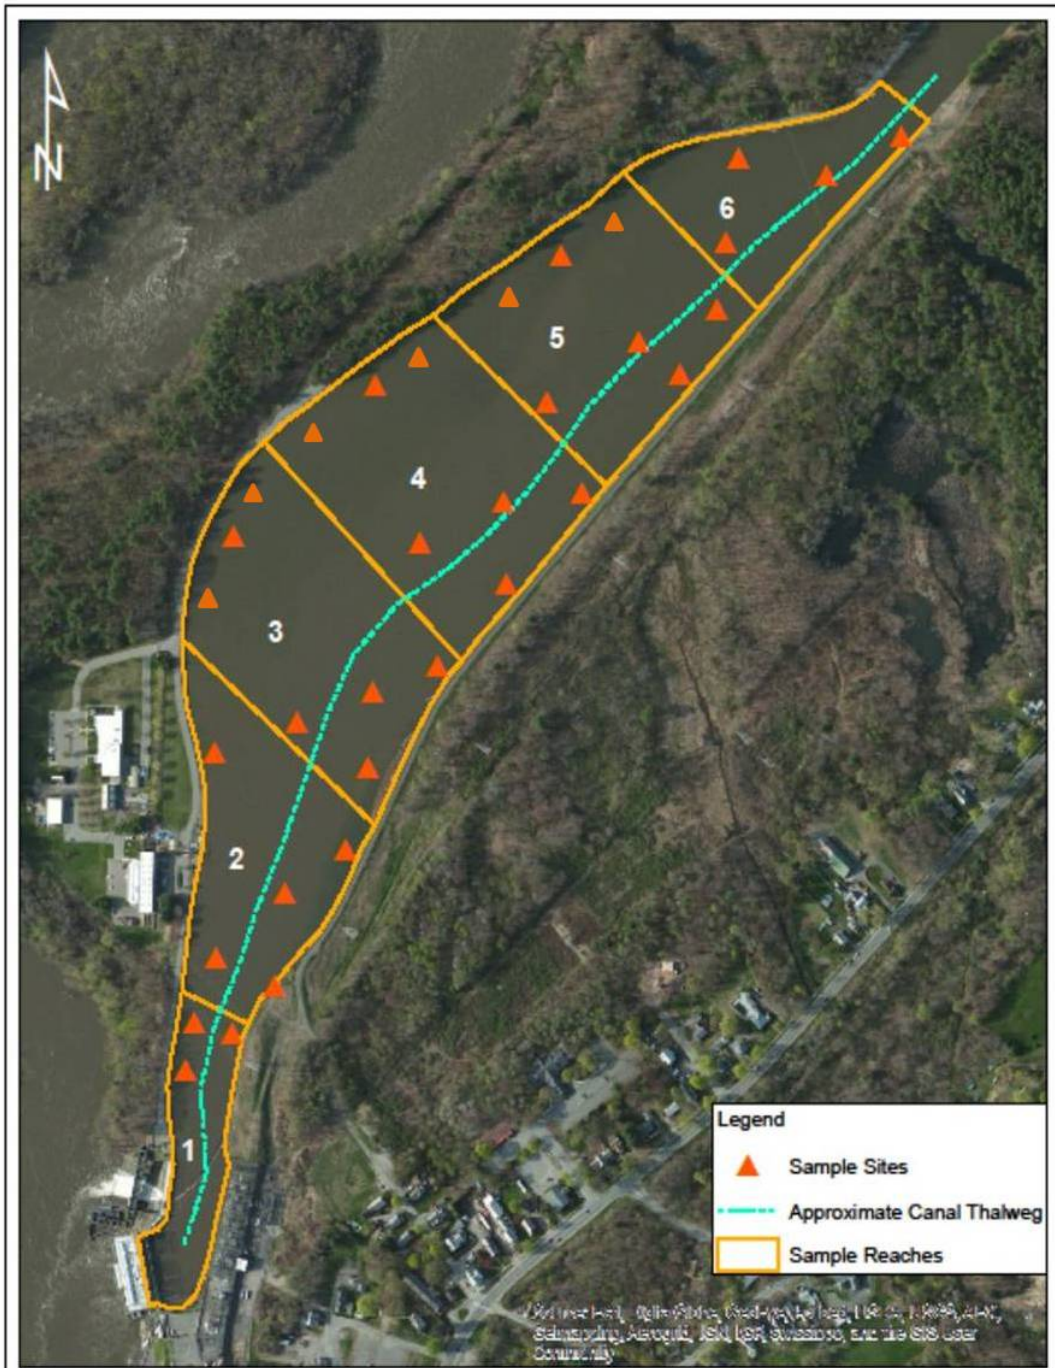

Sincerely,

Appendix A-5: Permit Program

PERMIT PROGRAM

TURNERS FALLS PROJECT FERC Project No. 1889

and

NORTHFIELD PROJECT FERC Project No. 2485

Approved By: _____

John S. Howard, Station Manager

Approval Date _____

5/1/08

1. INTRODUCTION

The overall administration of FirstLight Power Resources (FLPR) interests in Northfield and Turners Falls Project land, including hydro project land owned in fee by FLPR or in which FLPR has an interest, is the responsibility of the Northfield Mountain Station Manager. The use of the hydro project land will be consistent with hydro generation operating procedures and is subject to the general policies and guidelines established by FLPR.

2. GENERAL INFORMATION

FLPR hydro projects may be either licensed by the Federal Energy Regulatory Commission (FERC) or non-licensed. For both types of projects, it is the FLPR policy to protect the scenic, recreational, and other environmental values of the project consistent with safe, efficient operation. This policy describes the criteria by which proposed uses of the hydro land will be evaluated.

Land within the defined project boundary area of the Northfield and Turners Falls FERC licensed hydro projects is also subject to the requirements set forth in Exhibit 1. This Exhibit, which represents the Standard Land Use Article of the Northfield and Turners Falls Project licenses, is concerned with the use and occupancy of hydro project lands by parties other than FLPR.

Under this FERC standard article, certain categories of uses are permitted, with varying levels of FERC notification and control requirements. For the purpose of this policy, the categories are defined as follows:

Category A: Miscellaneous uses not addressed in subsequent categories which may require FERC approval to permit the use and/or convey an interest.

Category B: Uses such as (1) landscape planting; (2) non-commercial piers, landings, boat docks or similar facilities; and (3) embankments, bulkheads, retaining walls, or similar structures for erosion control to protect the existing shoreline.

Category C: Municipal and utility uses such as (1) replacement, expansion, realignment, or maintenance of bridges and roads for which all necessary State and Federal approvals have been obtained; (2) storm drains and water mains; (3) sewers that do not discharge into project waters; (4) minor access roads; (5) telephone, gas and electric distribution lines; (6) non-project overhead electric transmission lines that do not require erection of support structures within the project boundary; (7) submarine, overhead, or underground major telephone distribution cables or major electric distribution lines (69-kV or less); and (8) water intake or pumping facilities that do not extract more than one million gallons per day from a project reservoir.

Category D: Uses such as (1) construction of new bridges or roads for which all necessary State and Federal approvals have been obtained; (2) sewer or effluent lines that discharge into project waters, for which all necessary Federal and State water quality certificates or permits have been obtained; (3) other pipelines that cross project lands or waters but do not discharge into project waters; (4) non-project overhead electric transmission lines that require erection or support structures within the project boundary, for which all necessary Federal and State approvals have been obtained; (5) private or public marinas that can accommodate

no more than 10 watercraft at a time and are located at least one-half mile from any other private or public marina; (6) recreational development consistent with an approved Exhibit R or approved report on recreational resources of an Exhibit E; and (7) other uses, if: (i) the amount of land conveyed or a particular use is five acres or less: (ii) all of the land conveyed is located at least 75 feet, measured horizontally, from the edge of the project reservoir at normal maximum surface elevation: and (iii) no more than 50 total acres of project lands for each project development acres conveyed under this category in any calendar year.

FLPR should also, to the extent practical, be sure that proposed conveyances of FLPR land abutting hydro projects will not adversely affect the operation of that project.

3. INSTRUCTIONS

- 3.1 The responsibility for granting approval for any proposed use or conveyance of hydro lands shall rest with FPLR. No commitments shall be made or implied without such approval.
- 3.2 Requests for short term license agreements may be approved by the Station Manager.
- 3.3 Requests for long term leases or conveyance of hydro land use shall be referred by the Station Manager to FLPR Senior Management. All proposals for leases or conveyance of hydro project lands shall be made to FLPR Senior Management in writing, with the accompanying background/support information and, also, any appropriate recommendations and comments from station management.
- 3.4 FLPR Senior Management shall then review the proposed use with input, as appropriate, with other FLPR departments including the General Counsel.
- 3.5 In conducting the review of proposed uses for FERC-licensed projects, FLPR shall also use the criteria summarized in Exhibit 2.
 - 3.5.1 FLPR shall have the authority to grant permission for certain types of use and/or occupancy of project lands and waters and to convey certain interests in project lands and waters for certain types of use and occupancy, without prior FERC approval. FLPR shall exercise the authority only if the proposed use and/or occupancy are consistent with the purposes of protecting and/or enhancing the scenic, recreational, and other environmental values of the project.
 - 3.5.2 FLPR shall have continuing responsibility to control the use and occupancies for which it grants the covenants of the instrument of conveyance for any interest that it has conveyed. If a permitted use and occupancy violates any condition of the Standard Land Use Article or any other condition imposed by FLPR for protection and/or enhancement of the project's scenic, recreational, or other environmental values, or if a covenant of a conveyance made under the authority of the article is violated, FLPR shall take any lawful action necessary to correct the violation. For a permitted use or occupancy, that action includes, if necessary, cancelling the permission to use and occupy the project lands and waters and requiring the removal of any non-complying structures and facilities.

- 3.5.3** For Category “A” uses, station management shall consult with the appropriate FLPR departments and determine the proper method of processing the proposed use/conveyance request.
- 3.5.4** For Category “B” uses, FLPR may, among other things, establish a program for issuing permits for the specified types of use and occupancy of project lands and waters, which may be subject to the payment of a reasonable fee to cover FLPR’s costs of administering the permit program.

FLPR shall place emphasis on multiple use and occupancy of facilities for access to project lands or waters. FLPR shall also assure to the extent practical that the uses and occupancies for which it grants permission are maintained in good repair and comply with the applicable State and local environmental, health and safety requirements. Before granting permission for construction of bulkheads or retaining walls, FLPR shall: (1) inspect the site of the proposed construction, (2) consider whether the planting of vegetation, grading, or the use of riprap would be adequate to control erosion at the site, (3) determine that the proposed construction is needed and would not change the basic contour of the reservoir shoreline.

- 3.5.5** For Category “C” uses, no later than January 15 of each year, FLPR shall prepare a report for each licensed project briefly describing, for each conveyance made during the prior calendar year, the type of interest conveyed, the location of the lands subject to the conveyance, and the nature of the use for which the interest was conveyed. Three copies of this report shall be filed with FERC no later than January 31 of each year.
- 3.5.6** For Category “D” uses at least 60 days before conveying any interest in project lands, station management shall notify FLPR Senior Management of its intent to convey the interest and briefly describe the type of interest and location of the lands to be conveyed (a marked Exhibit G or K may be used), the nature of the proposed use, the identity of any Federal or State agency official consulted, and any Federal or State approvals required for the proposed use. The Station Manager shall be responsible for filing the letter with FERC at least 45 days prior to the conveyance. Unless FERC, within 45 days from the filing date, requires FLPR to file an application for prior approval, FLPR may convey the intended interest at the end of that period.
- 3.5.7** For both Categories “C” and “D” uses, before notifying the FERC, the appropriate FLPR function shall consult with Federal and State Fish and Wildlife or Recreation Agencies, as appropriate, and the State Historic Preservation Officer.

Also, before notifying the FERC, station management, with the appropriate inputs, shall determine that the proposed use of the lands to be conveyed is not inconsistent with any approved Exhibit R or approved report on recreational resources of an Exhibit E; or, if the project does not have an approved Exhibit R or approved report on recreational resources, that lands to be conveyed do not have recreational value.

The instrument of conveyance must include covenants running with the land adequate to ensure that: the use of the lands conveyed shall not endanger the health, create a nuisance, or otherwise be incompatible with overall project recreational use; and the grantee shall take all reasonable precautions to ensure that the construction, operation, and maintenance of structures or facilities on the conveyed lands will occur in a manner that will protect the scenic, recreational, and environmental values of the project.

3.5.8 If a proposed conveyance does not meet the criteria of the Standard Land Use Article, then additional steps shall be taken to affect the conveyance. These steps shall be determined based upon consultation with counsel and may include, for instance, a request for FERC prior approval.

3.5.9 To facilitate meeting the requirements above, the Station Manager shall maintain an up-to-date list of all approved uses.

FERC Project No. 2485
Northfield

Mr. Kenneth F. Plumb, Secretary
Federal Energy Regulatory Commission
825 North Capitol Street, N.E.
Washington, D.C. 20426

Dear Mr. Plumb:

Amendment of the License for Project No. 2485
By Adding Article No. 49

We have received a letter from Mr. William W. Lindsay, Director of the Office of Electric Power Regulation, offering us an opportunity to amend the license for Project No. 2485, Northfield, by adding a new standard article.

The new article gives the Licensee authority to grant permission for certain uses of project lands and waters and to convey certain interests in project lands without prior Commission approval. By this letter, we accept that new article as an amendment to the project license. The new article should be designated Article No. 49. A copy of the new article, with that article number filled in, is attached to this letter.

Very truly yours,

WESTERN MASSACHUSETTS ELECTRIC COMPANY

W. G. Council
Senior Vice President

October 6, 1980

William G. Council, being first duly sworn, deposes and says that he is Senior Vice President of the Western Massachusetts Electric Company, that he is authorized to verify and file the foregoing document, and that he has examined the foregoing document and knows the contents thereof; and that all statements therein are true to the best of his knowledge, information, and belief.

William G. Council

Subscribed and sworn to before me this 6th day of October 1980.

Donald Dell
Notary Public
My Commission Expires March 31, 1983

Article 49. (a) In accordance with the provisions of this article, the Licensee shall have the authority to grant permission for certain types of use and occupancy of project lands and waters and to convey certain interests in project lands and waters for certain other types of use and occupancy, without prior Commission approval. The Licensee may exercise the authority only if the proposed use and occupancy is consistent with the purposes of protecting and enhancing the scenic, recreational, and other environmental values of the project. For those purposes, the Licensee shall also have continuing responsibility to supervise and control the uses and occupancies for which it grants permission, and to monitor the use of, and ensure compliance with the covenants of the instrument of conveyance for, any interests that it has conveyed, under this article. If a permitted use and occupancy violates any condition of this article or any other condition imposed by the Licensee for protection and enhancement of the project's scenic, recreational, or other environmental values, or if a covenant of a conveyance made under the authority of this article is violated, the Licensee shall take any lawful action necessary to correct the violation. For a permitted use or occupancy, that action includes, if necessary, cancelling the permission to use and occupy the project lands and waters and requiring the removal of any non-complying structures and facilities.

(b) The types of use and occupancy of project lands and waters for which the Licensee may grant permission without prior Commission approval are: (1) landscape plantings; (2) non-commercial piers, landings, boat docks, or similar structures and facilities; and (3) embankments, bulkheads, retaining walls, or similar structures for erosion control to protect the existing shoreline. To the extent feasible and desirable to protect and enhance the project's scenic, recreational, and other environmental values, the Licensee shall require multiple use and occupancy of facilities for access to project lands or waters. The Licensee shall also ensure, to the satisfaction of the Commission's authorized representative, that the uses and occupancies for which it grants permission are maintained in good repair and comply with applicable State and local health and safety requirements. Before granting permission for construction of bulkheads or retaining walls, the Licensee shall: (1) inspect the site of the proposed construction, (2) consider whether the planting of vegetation or the use of riprap would be adequate to control erosion at the site, and (3) determine that the proposed construction is needed and would not change the basic contour of the reservoir shoreline. To implement this paragraph (b), the Licensee may, among other things, establish a program for issuing permits for the specified types of use and occupancy of project lands and waters, which may be subject to the payment of a reasonable fee to cover the Licensee's costs of administering the permit program. The Commission reserves the right to require the Licensee to file a description of its standards, guidelines, and procedures for

-2-

implementing this paragraph (b) and to require modifications of those standards, guidelines, or procedures.

(c) The Licensee may convey easements or rights-of-way across, or leases of, project lands for: (1) replacement, expansion, realignment, or maintenance of bridges and roads for which all necessary State and Federal approvals have been obtained; (2) storm drains and water mains; (3) sewers that do not discharge into project waters; (4) minor access roads; (5) telephone, gas, and electric utility distribution lines; (6) non-project overhead electric transmission lines that do not require erection of support structures within the project boundary; (7) submarine, overhead, or underground major telephone distribution cables or major electric distribution lines (69-kV or less); and (8) water intake or pumping facilities that do not extract more than one million gallons per day from a project reservoir. No later than January 31 of each year, the Licensee shall file three copies of a report briefly describing for each conveyance made under this paragraph (c) during the prior calendar year, the type of interest conveyed, the location of the lands subject to the conveyance, and the nature of the use for which the interest was conveyed.

(d) The Licensee may convey fee title to, easements or rights-of-way across, or leases of project lands for: (1) construction of new bridges or roads for which all necessary State and Federal approvals have been obtained; (2) sewer or effluent lines that discharge into project waters, for which all necessary Federal and State water quality certificates or permits have been obtained; (3) other pipelines that cross project lands or waters but do not discharge into project waters; (4) non-project overhead electric transmission lines that require erection of support structures within the project boundary, for which all necessary Federal and State approvals have been obtained; (5) private or public marinas that can accommodate no more than 10 watercraft at a time and are located at least one-half mile from any other private or public marina; (6) recreational development consistent with an approved Exhibit R or approved report on recreational resources of an Exhibit E; and (7) other uses, if: (i) the amount of land conveyed for a particular use is five acres or less; (ii) all of the land conveyed is located at least 75 feet, measured horizontally, from the edge of the project reservoir at normal maximum surface elevation; and (iii) no more than 50 total acres of project lands for each project development are conveyed under this clause (d)(7) in any calendar year. At least 45 days before conveying any interest in project lands under this paragraph (d), the Licensee must file a letter to the Director, Office of Electric Power Regulation, stating its intent to convey the interest and briefly describing the type of interest and location of the lands to be conveyed (a marked Exhibit G or K map may be used), the nature of the proposed use, the identity of any Federal or

-3-

State agency official consulted, and any Federal or State approvals required for the proposed use. Unless the Director, within 45 days from the filing date, requires the Licensee to file an application for prior approval, the Licensee may convey the intended interest at the end of that period.

(e) The following additional conditions apply to any intended conveyance under paragraphs (c) or (d) of this article:

(1) Before conveying the interest, the Licensee shall consult with Federal and State fish and wildlife or recreation agencies, as appropriate, and the State Historic Preservation Officer.

(2) Before conveying the interest, the Licensee shall determine that the proposed use of the lands to be conveyed is not inconsistent with any approved Exhibit R or approved report on recreational resources of an Exhibit E; or, if the project does not have an approved Exhibit R or approved report on recreational resources, that the lands to be conveyed do not have recreational value.

(3) The instrument of conveyance must include covenants running with the land adequate to ensure that: (i) the use of the lands conveyed shall not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use; and (ii) the grantee shall take all reasonable precautions to ensure that the construction, operation, and maintenance of structures or facilities on the conveyed lands will occur in a manner that will protect the scenic, recreational, and environmental values of the project.

(4) The Commission reserves the right to require the Licensee to take reasonable remedial action to correct any violation of the terms and conditions of this article, for the protection and enhancement of the project's scenic, recreational, and other environmental values.

(f) The conveyance of an interest in project lands under this article does not in itself change the project boundaries. The project boundaries may be changed to exclude land conveyed under this article only upon approval of revised Exhibit G or K drawings (project boundary maps) reflecting exclusion of that land. Lands conveyed under this article will be excluded from the project only upon a determination that the lands are not necessary for project purposes, such as operation and maintenance, flowage, recreation, public access, protection of environmental resources, and shoreline control, including shoreline aesthetic values. Absent extraordinary circumstances, proposals to exclude lands conveyed under this article from the project shall be consolidated for consideration when revised Exhibit G or K drawings would be filed for approval for other purposes.

2. Letter, W. G. Council to K. F. Plumb, dated October 6, 1980
3. Letter, J. D. Hebson to R. A. Reckert, dated December 1, 1980

Dear Mr. Plumb:

CORRECTION OF AMENDMENT OF THE LICENSE FOR PROJECT NO. 2485
BY ADDING ARTICLE NO. 52 AND BY DELETING ARTICLE NO. 21

In Reference 1, we were afforded an opportunity to amend the license for Project No. 2485, Northfield, by adding a new standard article. The new article gives the Licensee authority to grant permission for certain uses of project lands and waters and to convey certain interests in project lands without prior Commission approval.

In Reference 2, we have accepted that new article as an amendment to the project license, but had designated it as Article No. 49. In Reference 3 (copy enclosed), we were advised that the new article should have been designated as Article No. 52. Therefore, we now submit the attached new article with the correct article number filled in.

In further reviewing the matter, the new article, in our judgment, substantially replaces the authority currently contained in Article No. 21 (Form L-4, revised June 1, 1964) of the license for Project No. 2485. Accordingly, we request that the license be amended to delete Article No. 21.

Very truly yours,

FERC Project No. 1889
Turners Falls

Mr. Kenneth F. Plumb, Secretary
Federal Energy Regulatory Commission
825 North Capitol Street, N.E.
Washington, D.C. 20426

Dear Mr. Plumb:

Amendment of the License for Project No. 1889
By Adding Article No. 43
And By Deleting Article No. 37

We have received a letter from Mr. William W. Lindsay, Director of the Office of Electric Power Regulation, offering us an opportunity to amend the license for Project No. 1889, Turners Falls, by adding a new standard article.

The new article gives the Licensee authority to grant permission for certain uses of project lands and waters and to convey certain interests in project lands, without prior Commission approval. By this letter, we accept that new article as an amendment to the project license. The new article should be designated Article No. 43. A copy of the new article with that article number filled in, is attached to this letter.

In our judgment, the new article substantially replaces the authority currently contained in Article No. 37 of the license for Project No. 1889. Accordingly, we request that the license be amended to delete Article No. 37.

Very truly yours,

County of Hartford)

William G. Council, being first duly sworn, deposes and says that he is Senior Vice President of the Western Massachusetts Electric Company, that he is authorized to verify and file the foregoing document, and that he has examined the foregoing document and knows the contents thereof; and that all statements therein are true to the best of his knowledge, information, and belief.

William G. Council

Subscribed and sworn to before me this 6th day of October

1980.

Donald Dell

Notary Public

My Commission Expires March 31, 1983

(SEAL)

Article 43. (a) In accordance with the provisions of this article, the Licensee shall have the authority to grant permission for certain types of use and occupancy of project lands and waters and to convey certain interests in project lands and waters for certain other types of use and occupancy, without prior Commission approval. The Licensee may exercise the authority only if the proposed use and occupancy is consistent with the purposes of protecting and enhancing the scenic, recreational, and other environmental values of the project. For those purposes, the Licensee shall also have continuing responsibility to supervise and control the uses and occupancies for which it grants permission, and to monitor the use of, and ensure compliance with the covenants of the instrument of conveyance for, any interests that it has conveyed, under this article. If a permitted use and occupancy violates any condition of this article or any other condition imposed by the Licensee for protection and enhancement of the project's scenic, recreational, or other environmental values, or if a covenant of a conveyance made under the authority of this article is violated, the Licensee shall take any lawful action necessary to correct the violation. For a permitted use or occupancy, that action includes, if necessary, cancelling the permission to use and occupy the project lands and waters and requiring the removal of any non-complying structures and facilities.

(b) The types of use and occupancy of project lands and waters for which the Licensee may grant permission without prior Commission approval are: (1) landscape plantings; (2) non-commercial piers, landings, boat docks, or similar structures and facilities; and (3) embankments, bulkheads, retaining walls, or similar structures for erosion control to protect the existing shoreline. To the extent feasible and desirable to protect and enhance the project's scenic, recreational, and other environmental values, the Licensee shall require multiple use and occupancy of facilities for access to project lands or waters. The Licensee shall also ensure, to the satisfaction of the Commission's authorized representative, that the uses and occupancies for which it grants permission are maintained in good repair and comply with applicable State and local health and safety requirements. Before granting permission for construction of bulkheads or retaining walls, the Licensee shall: (1) inspect the site of the proposed construction, (2) consider whether the planting of vegetation or the use of riprap would be adequate to control erosion at the site, and (3) determine that the proposed construction is needed and would not change the basic contour of the reservoir shoreline. To implement this paragraph (b), the Licensee may, among other things, establish a program for issuing permits for the specified types of use and occupancy of project lands and waters, which may be subject to the payment of a reasonable fee to cover the Licensee's costs of administering the permit program. The Commission reserves the right to require the Licensee to file a description of its standards, guidelines, and procedures for

-2-

implementing this paragraph (b) and to require modifications of those standards, guidelines, or procedures.

(c) The Licensee may convey easements or rights-of-way across, or leases of, project lands for: (1) replacement, expansion, realignment, or maintenance of bridges and roads for which all necessary State and Federal approvals have been obtained; (2) storm drains and water mains; (3) sewers that do not discharge into project waters; (4) minor access roads; (5) telephone, gas, and electric utility distribution lines; (6) non-project overhead electric transmission lines that do not require erection of support structures within the project boundary; (7) submarine, overhead, or underground major telephone distribution cables or major electric distribution lines (69-kV or less); and (8) water intake or pumping facilities that do not extract more than one million gallons per day from a project reservoir. No later than January 31 of each year, the Licensee shall file three copies of a report briefly describing for each conveyance made under this paragraph (c) during the prior calendar year, the type of interest conveyed, the location of the lands subject to the conveyance, and the nature of the use for which the interest was conveyed.

(d) The Licensee may convey fee title to, easements or rights-of-way across, or leases of project lands for: (1) construction of new bridges or roads for which all necessary State and Federal approvals have been obtained; (2) sewer or effluent lines that discharge into project waters, for which all necessary Federal and State water quality certificates or permits have been obtained; (3) other pipelines that cross project lands or waters but do not discharge into project waters; (4) non-project overhead electric transmission lines that require erection of support structures within the project boundary, for which all necessary Federal and State approvals have been obtained; (5) private or public marinas that can accommodate no more than 10 watercraft at a time and are located at least one-half mile from any other private or public marina; (6) recreational development consistent with an approved Exhibit R or approved report on recreational resources of an Exhibit E; and (7) other uses, if: (i) the amount of land conveyed for a particular use is five acres or less; (ii) all of the land conveyed is located at least 75 feet, measured horizontally, from the edge of the project reservoir at normal maximum surface elevation; and (iii) no more than 50 total acres of project lands for each project development are conveyed under this clause (d)(7) in any calendar year. At least 45 days before conveying any interest in project lands under this paragraph (d), the Licensee must file a letter to the Director, Office of Electric Power Regulation, stating its intent to convey the interest and briefly describing the type of interest and location of the lands to be conveyed (a marked Exhibit G or K map may be used), the nature of the proposed use, the identity of any Federal or

-3-

State agency official consulted, and any Federal or State approvals required for the proposed use. Unless the Director, within 45 days from the filing date, requires the Licensee to file an application for prior approval, the Licensee may convey the intended interest at the end of that period.

(e) The following additional conditions apply to any intended conveyance under paragraphs (c) or (d) of this article:

(1) Before conveying the interest, the Licensee shall consult with Federal and State fish and wildlife or recreation agencies, as appropriate, and the State Historic Preservation Officer.

(2) Before conveying the interest, the Licensee shall determine that the proposed use of the lands to be conveyed is not inconsistent with any approved Exhibit R or approved report on recreational resources of an Exhibit E; or, if the project does not have an approved Exhibit R or approved report on recreational resources, that the lands to be conveyed do not have recreational value.

(3) The instrument of conveyance must include covenants running with the land adequate to ensure that: (i) the use of the lands conveyed shall not endanger health, create a nuisance, or otherwise be incompatible with overall project recreational use; and (ii) the grantee shall take all reasonable precautions to ensure that the construction, operation, and maintenance of structures or facilities on the conveyed lands will occur in a manner that will protect the scenic, recreational, and environmental values of the project.

(4) The Commission reserves the right to require the Licensee to take reasonable remedial action to correct any violation of the terms and conditions of this article, for the protection and enhancement of the project's scenic, recreational, and other environmental values.

(f) The conveyance of an interest in project lands under this article does not in itself change the project boundaries. The project boundaries may be changed to exclude land conveyed under this article only upon approval of revised Exhibit G or K drawings (project boundary maps) reflecting exclusion of that land. Lands conveyed under this article will be excluded from the project only upon a determination that the lands are not necessary for project purposes, such as operation and maintenance, flowage, recreation, public access, protection of environmental resources, and shoreline control, including shoreline aesthetic values. Absent extraordinary circumstances, proposals to exclude lands conveyed under this article from the project shall be consolidated for consideration when revised Exhibit G or K drawings would be filed for approval for other purposes.

EXHIBIT 2

| Article Paragraph | B | C | D |
|----------------------------|--|--|--|
| Interest Conveyed | Use & Occupancy Only | Easements Rights-of-Way Leases | Easements Rights-of-Way Leases Fee Title |
| Types of Uses | (1) Landscape plantings, Lawns, Gardens. | (1) Replace, expansion, realignment of roads and bridges. | (1) Construction of new roads and bridges |
| | (2) Non-commercial waterfront facilities, docks, piers, rafts. | (2) Non-project overhead electric transmission lines not requiring a support structure within Project Boundary. | (2) Non-project overhead electric transmission lines requiring a support structure within the Project Boundary. |
| | (3) Erosion Control structures. | (3) Sewers not discharging to Project Waters. | (3) Sewers discharging to Project Waters. |
| | | (4) Storm drains and water mains. | (4) Other pipe lines crossing Project lines or waters that do not discharge to Project Waters. |
| | | (5) Telephone, gas or electric distribution lines. | (5) Private or public marinas accommodating no more than 10 water craft and local at least 1/2 miles from other public private marina. |
| | | (6) Minor access roads. | (6) Recreational developments consistent with an approved Exhibit R or K. |
| | | (7) Submarine, overhead, underground major telephone transmission cables and major electric distribution (69 KV or less) lines. | (7) Other uses, provided: (a) 5 acres or less (b) 75 feet horizontally from normal maximum © No more than 50 acres conveyed in this manner at the Project each year. |
| | | (8) Water intake or pumping facilities that extract less than 1 MGD of water from the Project Reservoir. | |
| Procedure Requirement | Establish permit policy and procedure: Fees Inspections Justification | Establish Conveyance Procedures *Standard Covenants *Compliance Inspections *Evaluation of Impact on Natural Values *Agency Consultations *Remedial Actions | Establish Conveyance Procedures *Standard Covenants *Compliance Inspections *Evaluation of Natural Values *Agency Consultations *Remedial Actions |
| FERC Submittal Requirement | None, file procedures and policy on request only. | File report (3 copies) on or before Jan. 31 each year containing: (a) Description of each conveyance made (b) Location on Exhibit K or G maps © Nature/Type of Use (d) Agency Consultation Conducted | Notify FERC, 45 days in advance of intent to convey interest in a specific parcel: (a) Describe type of interest (b) Location on Exhibit K or G Maps © Nature/Type of proposed use (d) Agency Consultations conducted (e) Federal or State approvals required for such use. If no FERC action convey interest. |

Attachment B: Responses to Mr. Karl Meyer comments**Karl Meyer March 28, 2015 Letter:****Study 3.3.6: Impact of Project Operations on Shad Spawning, Spawning Habitat, and Egg Deposition in the Area of the Northfield Mountain and Turners Falls Projects**

Please indicate, from information available from US Conte Lab temperature sensors in the canal, the water temperatures on all nights that spawning was observed both in the TF Power Canal and in the Bypass Reach including at the Rock Dam site.

FirstLight response:

Spawning was observed once in the canal on June 17, 2015 and the water temperature was 19.4°C. Spawning was observed once in the bypass reach on June 18, 2015 and the water temperature was 19.3°C. These water temperatures were collected as part of Study No. 3.2.1, Water Quality monitoring.

Please also indicate, throughout the spawning study period, which days and continuous hours Station 1 was operating during the surveys—as well as the dates or any times it did not operate, or times when its operation was temporarily interrupted.

Please also explain how aural detection of shad spawning in the pool directly below the Rock Dam was accomplished, given its backdrop of falling water.

FirstLight response:

Notes on the data sheet indicate that spawning was observed in the backwater area below the Rock Dam on June 18, 2015 from 2217-2233. During the observation there was an approximately 1,000 cfs bypass flow and 13,000 cfs from Cabot Station. Station No. 1 was not running. Observers noted on field sheets that they were able to walk to a point below Rock Dam pool where they observed the spawning. There was no need to rely on aural detection of spawning

Study 3.3.11 Fish Assemblage

In the Bypass Reach your findings note that “All mesohabitats sampled” in Late Summer, and that the “Rock Dam Pool” was sampled via electrofishing. A closer look at the data and information supplied indicates that a slow, shallow pool above the Rock Dam was electrofished, rather than the deep, oxygenated pool directly downstream of the Rock Dam formation with its variety of depths and niche habitats that all agency participants and stakeholders have long-identified as the Rock Dam Pool throughout this process.

Please indicate why this pool, as a unique mesohabitat, was excluded, and why the slow, shallow pool that has not been an area of interest for assessing assembled fish species, was used instead.

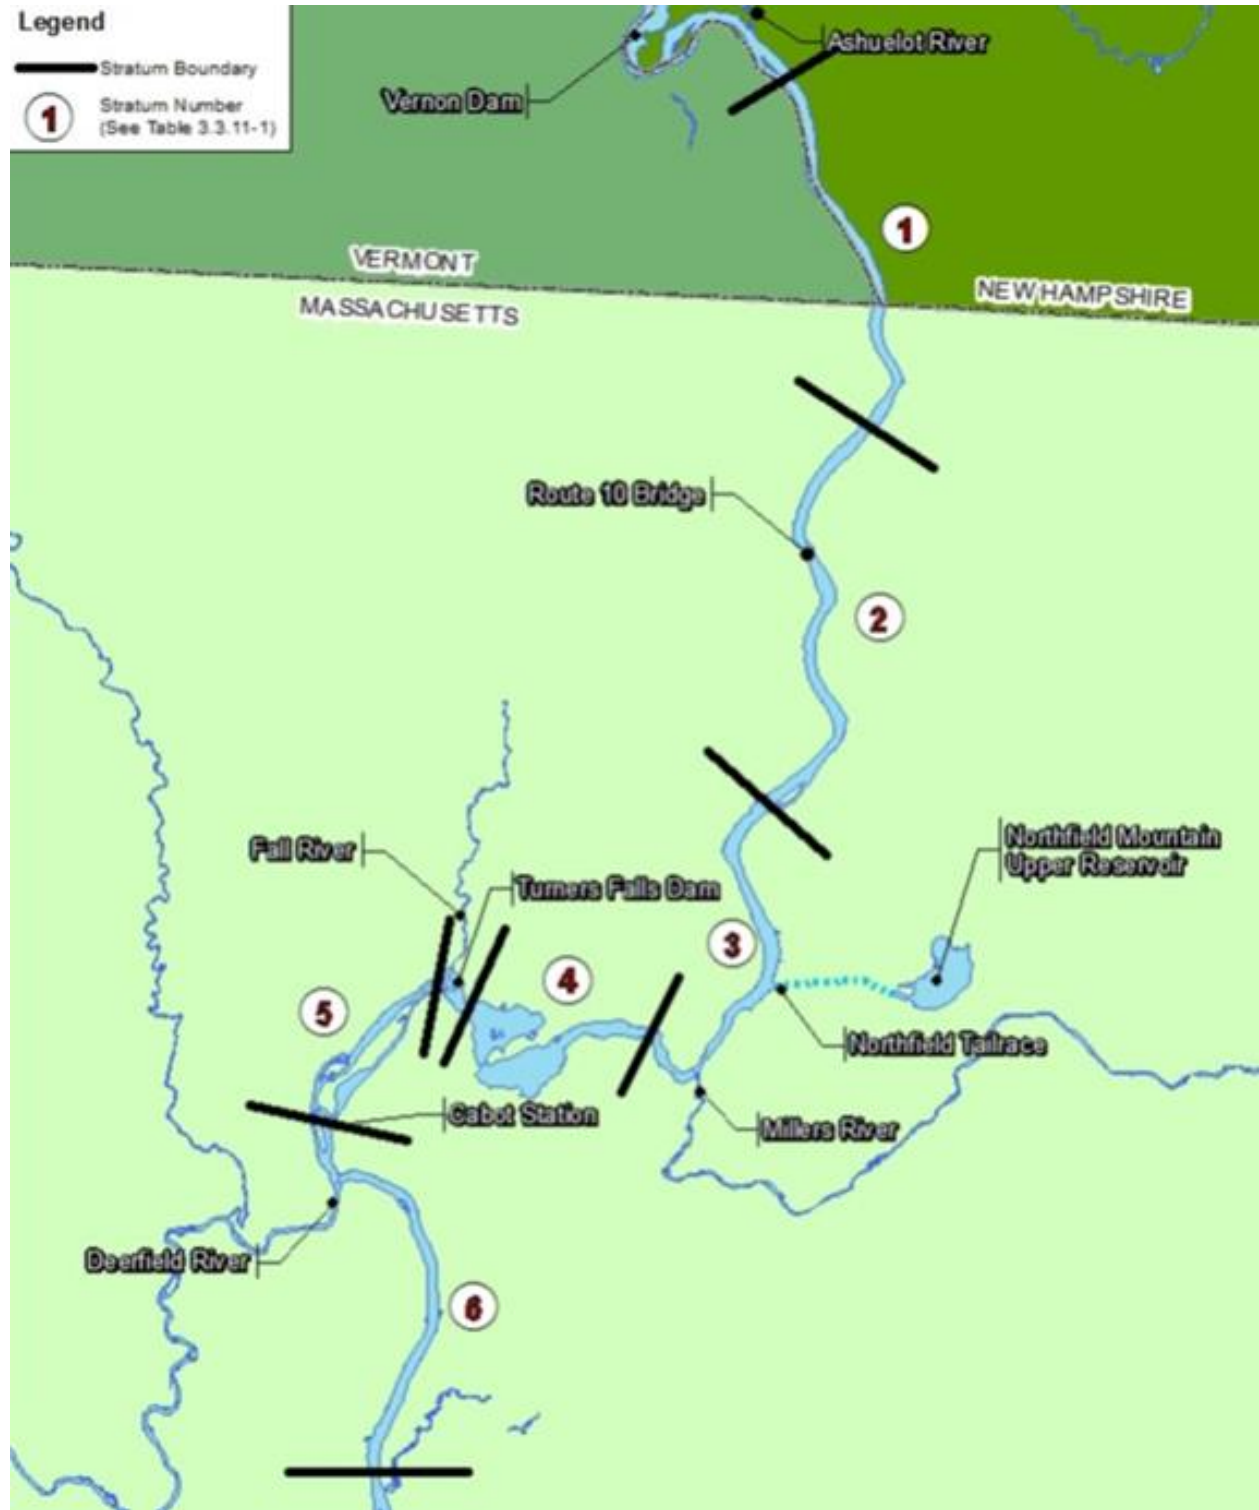

FirstLight response:**From July 15, 2013 Letter from NMFS to FERC (comments on Proposed Study Plans)**

As discussed at the May 30, 2013 study plan meeting and in a follow-up conference call with FERC staff on June 18, 2013, endangered shortnose sturgeon occur in the area where the electrofishing transects are proposed. Shortnose sturgeon may be affected if exposed to electric current generated during these activities. Due to the sensitivities of spawning adults and early life stages present in Transect 5 and the presence of juveniles and adults year round in Transect 6, we recommend that the study be modified to eliminate the potential for effects or that FERC initiate formal consultation pursuant to section 7 of the Endangered Species Act (ESA) with NMFS to assess effects of this study.

As depicted in [Appendix B-1](#), Transect 5 ends at the Rock Dam and Transect 6 is below. Based on the map below and information on where shortnose sturgeon had been located in past surveys, electrofishing ceased at the Rock Dam to ensure there was no incidental take of ESA shortnose sturgeon. Data from the 2009

Midwest Biodiversity Institute (MBI) fish survey in that area are available as shown in [Appendix B-1](#). The area was sampled in August and October 2009. Between the fish assemblage data collected during FirstLight's survey and the data collected in 2009 by MBI, there are sufficient data to determine the assemblage between Rock Dam and Cabot Station.
